WCBEA@LCCC sincerely appreciates past and continuing cooperation of the entities listed in our data sources throughout the report. This report would not be possible without the financial support of the Cheyenne-Laramie County Economic Development Joint Powers Board and Cheyenne LEADS.

Economic Indicators Analysis

Economic Indicators for the Second Quarter 2017

Overview

Laramie County has not yet returned to the level of economic activity it experienced prior to the decline in energy prices and the subsequent downturn in the Wyoming economy, but there were some encouraging signs in the second quarter of 2017. Most of the major indicators posted positive gains over the last year including: jobs, retail sales, tax collections, oil activity, and residential construction in the city of Cheyenne.

From the second quarter of 2016 to the second quarter of 2017, both the Local Area Unemployment Statistics (LAUS) data and the Current Employment Statistics data indicated an increase in the number of jobs in Laramie County. The LAUS data showed a gain of 1,878 jobs (4.1%) while the Current Employment Statistics (CES) data indicated a gain of 233 jobs (0.5%).

However, from the first to second quarter of 2017, LAUS data reported a decrease of 735 jobs (-1.5%), while CES data indicated an increase of 1,100 during the same time period (2.4%) in Laramie County. The two sources of employment data often tell contradictory stories and this was the case again this quarter. The LAUS data indicated that fewer Laramie County residents were working. The CES data reflect a count of jobs not workers, and showed an increase in the number of jobs in the county. The increase in CES jobs over the last quarter may be a result of multiple job holding by both residents and non-residents alike, i.e. one person with more than one job. This possible explanation raises issues about the local labor market. If Laramie County residents are working more than one job, they are likely to be doing it out of economic necessity. If more Laramie County jobs are being held by nonresidents, then local employers may be unable to find an adequate number of suitable local workers to fill job vacancies.

The general level of economic activity in Laramie County – as measured by retail sales – increased by 10.2 percent over the last quarter and 13.4 percent over the last year. Sales tax collections and tax receipts to local government entities generally move in the same direction and were both up over the last quarter and year-over-year. Total sales tax collections increased 14.0 percent over the last year and 9.0 percent from first to the second quarter of 2017. Total tax receipts by local governments rose 14.0 percent over the last year and 8.7 percent over the last quarter.

It was encouraging to see both a quarterly and a year-over-year increase in total tax collections in Laramie County, but it is worth noting that the \$25,796,000 in tax collections in the second quarter of 2017, was lower than quarterly tax collections in any quarter of 2014, 2015, and three of the four quarters of 2016. Laramie County has not yet returned to the level of economic activity it experienced prior to the decline in energy prices.

Oil activity picked up over the last year in Laramie County -- oil production was up 25.5 percent, the number of active wells was up 14.3 percent, and the 23 spuds, (newly drilled oil wells), in the first two quarters of 2017 exceeded the total of 11 for all of 2016.

Residential construction was up over the last year in the city of Cheyenne, but down in the rural part of Laramie County. In the city of Cheyenne the number of single-family building permits rose from 47 in the second quarter of 2016 to 57 in the second quarter of 2017 (21.3%). Outside Cheyenne, single-family building permits fell from 60 in the second quarter of 2016 to 43 in the second quarter of 2017 (-28.3%).

The average monthly value of authorized construction in the city of Cheyenne fell by 7.1 percent over the last year, but rose 43.3 percent from the first to the second quarter of 2017. The largest part of this increase was construction associated with the new airport.

This report contains detailed information and analysis on a wide range of economic indicators for the Greater Cheyenne area. Please feel free to contact the WCBEA@LCCC with any questions.

Labor Market

From the second quarter of 2016 to the second quarter of 2017, both the Local Area Unemployment Statistics (LAUS) data and the Current Employment Statistics data indicated an increase in the number of jobs in Laramie County. The LAUS data showed a gain of 1,878 jobs (4.1%) while the Current Employment Statistics (CES) data indicated a gain of 233 jobs (0.5%).

From the first to second quarter of 2017, LAUS data reported a decrease of 735 jobs (-1.5%), while CES data indicated an increase of 1,100 during the same time period (2.4%). The two sources of employment data often tell contradictory stories and this was the case again this quarter. It is important to remember the difference between the LAUS data and the CES data.¹ LAUS data are based on a survey of households and CES data are based on a survey of employers. The LAUS data indicated that fewer Laramie County residents were working. The CES data reflect a count of **jobs** not workers and showed an increase in the number of jobs in the county. The increase in CES jobs over the last quarter may be a result of multiple job holding by both residents and non-residents alike, i.e. one person with more than one job. This possible explanation raises issues about the local labor market. If Laramie County residents are working more than one job, they are likely to be doing it out of economic necessity. If more Laramie County jobs are being held by nonresidents, then local employers may be unable to find an adequate number of suitable local workers to fill job vacancies.

The number of unemployed workers fell over the last year, from 1,990 in the second quarter of 2016 to 1,737 in the second quarter of 2017 (-12.7%). The number of unemployed workers also fell over the last quarter, from 2,133 in the first quarter to 1,736 in the second quarter of 2017 (-18.6%).

The average monthly unemployment rate fell over the last year, from 4.2 percent in the second quarter of 2016 to 3.5 percent in the second quarter of 2017. The unemployment rate also fell over the last quarter, from an average monthly rate of 4.2 percent in the first quarter to 3.5 percent in the second quarter of 2017.

The unemployment rate in the state of Wyoming has also fallen over the past year, from 5.7 percent in the second quarter of 2016 to 4.1 percent in the second quarter of 2017. However, unlike Laramie County, the decline in Wyoming's unemployment rate can be attributed, at least in part, to a reduction in the overall labor force. The labor force will decline when people stop looking for jobs or because they leave the state. As a result of the current economic downturn, the state of Wyoming is losing population. Unlike the state of Wyoming, both the population and the civilian labor force of Laramie County has increased, though only slightly, over the last two years.

¹ For more information regarding the LAUS methodology, please see <https://doe.state.wy.us/lmi/laus/toc.htm>, Brief Explanation of the LAUS methodology (posted on 05/15/2017). For more information regarding the CES methodology, please see <https://www.bls.gov/sae/sample.htm>.

Initial unemployment claims were down over the last year from a monthly average of 56 in the second quarter of 2016 to a monthly average of 50 in the second quarter of 2017 (-11.8%). Initial unemployment claims also fell over the last quarter, from 83 in the first quarter to 50 in the second quarter of 2017 (40.2%). The number of help wanted ads fell over the last year from a monthly average of 760 in the second quarter of 2016 to 565 in the second quarter of 2017 (-25.7%). The number of help wanted ads rose over the last quarter, from a monthly average of 543 in the first quarter to 565 in the second quarter of 2017 (4.0%).

Avg Monthly Help Wanted Ads	925	760	543	565	-38.98	-25.67	3.99

Source: Labor Market statistics are compiled from two major sources: Current Population Survey (CPS) and Current Employment Statistics (CES). Local Area Unemployment Statistics (LAUS) are estimated based on CPS data which are collected through household surveys in which individuals are reported as employed, unemployed or not in the labor force. These data include employment for both agriculture and nonagricultural industries. CES data are based on establishment (employer) records compiled through monthly surveys of nonfarm employers. Individuals who worked in more than one establishment, full or part-time, are counted each time their names appear on payrolls. Data for help wanted ads come from Wyoming Department of Workforce Services.

General Business Activity

Table 2 provides some basic indicators of the level of economic activity in Laramie County.

Estimated retail sales for the second quarter of 2017 were \$320,816,000. This was an increase of 13.4 percent from one year ago and an increase of 10.2 percent from the first quarter of 2017. Detailed information about retail sales by subsector is available in Table 3A in the Government Finances section of this report.

Average monthly enplanements – defined as commercial passenger boardings – decreased over the last year, from 128 in the second quarter of 2016 to 79 in the second quarter of 2017 (-38.2%).

Average monthly auto registrations rose from 2,875 in the first quarter to 3,408 in the second quarter of 2017 (18.5%) and rose 4.2 percent year-over-year.

Bankruptcies were up over the last year from a monthly average of 16 in the second quarter of 2016 to a monthly average of 18 in the second quarter of 2017. The average monthly number of bankruptcies also rose quarterly, from 13 in the first quarter to 18 in the second quarter of 2017.

Table 2A provides information on the oil sector and oil activity in Laramie County. National oil prices fell from an average of \$52 per barrel in the first quarter to \$48 in the second quarter of 2017 (-6.8%). Oil prices were up year-over-year, from \$45 to \$48 per barrel (6.2%). These price fluctuations were accompanied by expected fluctuations in production – average monthly oil production fell by 10.1 percent from the first to the second quarter of 2017, but was up 25.5 percent year-over-year.

The number of active wells in the county rose over the last year, from a monthly average of 243 in the second quarter of 2016 to 278 in the second quarter of 2017 (14.3%). The average number of wells remained unchanged at 278 from the first to the second quarter of 2017. The number of spuds – defined as a newly drilled oil well – is an indicator of future activity in this sector. In 2014 there were 115 spuds in Laramie County. The number of spuds fell to 62 in 2015 and to 11 in 2016. As of the end of the second quarter of 2017, 23 spuds were drilled.

Figure 5. Laramie County Retail Sales, 1998-2017, Monthly Totals

Source: WCBEA from Wyoming Department of Revenue, Sales and Use Tax Report of Distribution Amounts by Entity, by Tax Type and Total Distribution by Minor Class and by County.

Notes: Retail sales are estimated by WCBEA from Laramie County specific purpose sales and use tax collections.

The significant increase in retail sales in October 2013, followed by a significant decline in November 2013 was due to large retail tax collections on purchases of peripheral computer equipment and software by data centers under construction in the county that were later deemed tax exempt and refunded.

Spuds ²	115	62	11	23	-46.09	-82.26	N/A

Notes: ¹Historical data are not reported for Applications for Permit to Drill prior to the second quarter of 2016 due to recent changes in the permit rules. Prior to February 2016, permits were active for a period of 1 year. Since February 2016, permits are active for a period of 2 years.

²Spuds refer to new wells. To "spud" a well means to begin drilling operations.

Sources: Wyoming Oil and Gas Conservation Commission and Cushing, OK, West Texas Intermediate crude oil spot price.

Government Finances

Table 3 provides information on tax collections and receipts.

The Wyoming state sales and use tax is 4.0 percent. Local and optional taxes may be assessed if approved by voters. Laramie County imposes a 1.0 percent optional sales and use tax, and recently renewed the additional 1.0 percent specific purpose sales and use tax (effective October 1, 2017). Specific purpose sales taxes are designed to raise a specific amount of money for approved projects within the county. Once the monetary threshold is reached to fund the approved projects, the tax ceases to be collected. Sales taxes are imposed on retail sales of goods and services subject to taxation. Use taxes are imposed when purchases are made out-of-state and brought into Wyoming for storage, use or consumption. Lodging taxes may be imposed by counties or cities on lodging services defined as overnight accommodations for transient guests (less than 30 continuous days). Lodging services are also subject to sales taxes. The lodging tax in Laramie County is 4.0 percent. (Total tax imposed on lodging services is 10.0 percent.)

A portion (31%) of state sales and use tax collections are distributed to the counties. In Laramie County, these state sales and use tax collections are then distributed to the county as well as the cities of Cheyenne, Burns, Pine Bluffs, and Albin, based on population.

Both total tax collections and tax receipts by local government entities rose in the second quarter of 2017. Total tax collections rose 14.0 percent over the last year and 9.0 percent from the first to the second quarter of 2017. Total tax receipts by local governments rose 14.0 percent over the last year and 8.7 percent over the last quarter.

While it was encouraging to see both a quarterly and a year-over-year increase in tax collections in Laramie County, it is worth noting that the \$25,796,000 in tax collections in the second quarter of 2017, was lower than quarterly tax collections in any quarter of 2014, 2015, and three of the four quarters of 2016. Laramie County has not yet returned to the level of economic activity it experienced prior to the decline in energy prices and the subsequent downturn in the Wyoming economy.

Lodging tax receipts were up 3.0 percent over the last year, from the second quarter of 2016 to the second quarter of 2017, and up 19.0 percent from the first to the second quarter of 2017. This increase in lodging tax receipts may have been, at least in part, associated with the increase in oil and gas activity we have seen in Laramie County over the last year. As indicated in the General Business Activity section of this report, oil production and the number of active wells have both increased over the last year.

Table 3A presents Laramie County total taxable sales and estimated retail sales by subsector. From the second quarter of 2016 to the second quarter of 2017, all but three of the fourteen subsectors had an increase in retail sales. Four subsectors are consistently the top contributors, accounting for about 60 percent of retail sales in Laramie County – Automobile Sales, Eating and Drinking Places, Building Material & Garden, and General Merchandise Stores. Of these top four subsectors, there were increases over the quarter in Automobile Sales (24.8%), Building Material and Garden (31.1%), and Eating and

Drinking Places (12.6%). Only General Merchandise Stores had a decrease in sales (-4.3%) from the first quarter of 2017.

Source: WCBEA analysis of Wyoming Department of Revenue, Sales and Use Tax Report of Distribution Amounts by Entity, by Tax Type and Total Distribution by Minor Class and by County.

Notes: ¹Includes the 4% Sales and Use Tax, the 1% Optional Sales and Use Tax, the Out of State Sales and Use Tax, as well as interest payments penalties and application fees.

²Includes the 4% Sales and Use Tax, the 1% Optional Sales and Use Tax, the Out of State Use Tax, and the Out of State Sales Tax.

Data represent the total share of collected taxes received by entities within Laramie County including Laramie County, the city of Cheyenne, the town of Burns, the town of Albin and the town of Pine Bluffs.

The percentage of sales & use tax collections distributed to counties is 31%.

Data reported represent quarterly totals.

Financial Sector

Table 4 provides information on credit unions and commercial banks in Laramie County.

Deposits to and loans from Laramie County credit unions grew this quarter. Deposits were up 7.7 percent over the last year and 0.02 percent from the first to the second quarter of 2017. Credit union loans grew by 9.1 percent over the last year and 2.4 percent from the first to the second quarter of 2017.

Data on total deposits in all FDIC-insured institutions (commercial banks) in Laramie County are available only on an annual basis and were updated in the December 2016 Economic Indicators report. Total deposits in commercial banks were up 31.0 percent over the three-year period from 2013 to 2016, 26.2 percent over the two-year period from 2014 to 2016 and 16.0 percent over the most recent year, from 2015 to 2016.

Table 4A shows commercial banks, their total deposits, and their market share. This table is also updated annually. The largest bank in Laramie County is Wells Fargo Bank with \$595,103,000 in deposits representing a 33.3 percent market share. The five largest banks together have a 70.6 percent share of the market. That is, these five largest banks taken together hold 70.6 percent of all deposits in Laramie County commercial banks.

Residential Construction

Tables 5 and 5A present data for new residential and commercial construction in Laramie County and the city of Cheyenne.

In the city of Cheyenne the number of single-family residential building permits issued fell from 67 in the first quarter to 57 in the second quarter of 2017 (-14.9%). Outside Cheyenne, the number of single-family building permits increased slightly, from 42 in the first quarter to 43 in the second quarter (2.4%).

In the city of Cheyenne the number of single-family building permits rose over the last year – from 47 in the second quarter of 2016 to 57 in the second quarter of 2017 (21.3%), while outside Cheyenne single-family building permits fell, from 60 in the second quarter of 2016 to 43 in the second quarter of 2017 (-28.3%).

Housing data from Core Logic were included in both the Economic Indicators and Annual Trends reports for the last four years. Unfortunately the cost of these data is now prohibitive and the data are longer included in our report.

While the average monthly value of authorized construction fell 7.1 percent over the last year, from the second quarter of 2016 to the second quarter of 2017, there was a 43.3 percent increase from the first to the second quarter of 2017. The largest part of this increase was construction associated with the new airport.

The Utilities section of Table 5 presents data on utility usage in Laramie County. Average monthly commercial and industrial power usage decreased 2.1 percent from the first to the second quarter of 2017 and decreased 0.6 percent from one year ago.

The rate of growth in average monthly metered water taps remained well below 1.0 percent for both the Cheyenne Board of Public Utilities and the South Cheyenne Water & Sewer District over the last year. Most new water taps are residential and this low rate of increase was consistent with the very low population growth in Laramie County.

Commercial Property Vacancies

By the end of second quarter of 2017, there were 120 active properties on the local commercial real estate market, representing a small increase (2.6%) from both the first quarter of 2017 and one year ago. While available office space properties remained relatively flat over the quarter, available warehousing and retail space both increased; in the case of retail, the vacancy rate increased to 12.2 percent, the highest rate recorded since this report's inception in 2009.

Over the current quarter, the number of available warehousing units increased 16.7 percent (+4), the total square footage increased by 6.6 percent and the overall vacancy rate increased from 8.8 percent to 9.4 percent. The average lease rate increased to \$8.24/sf as compared to \$7.98/sf at the end of the first quarter. Total vacant square footage ended the quarter at 484,820 sf as compared to 454,408 sf at the end of the first quarter of 2017, an increase of 6.7 percent.

The number of available retail properties decreased from the first quarter 2017 (-2) while the overall vacancy rate increased from 9.6 to 12.2 percent. This is primarily due to the inclusion of the vacated Kmart retail space (104,828 sf). Vacancies at area malls also continued to increase; the vacancy rate at Frontier Mall increased from 9 percent to 11 percent from the first quarter to the second quarter of 2017. The total amount of vacant retail space ended the quarter at 422,579 sf as compared to 333,624 sf at the end of first quarter 2017. In addition to the former Kmart space, other large properties remained vacant, including the former Sutherlands (76,749 sf), Cole Safeway store (44,358 sf) and the Grier and Nuss buildings (19,715 sf).

The number of available office properties increased 2.0 percent by the end of second quarter 2017 (+1 unit) while the amount of total square footage decreased by about 3,300 sf. The vacancy rate for this property type decreased from 12.8 to 12.4 percent over the quarter. The vacancy rate is up from one year ago when it was 10.5 percent at the end of the second quarter 2016. Total vacant office space by the quarter's end stood at 269,645 sf compared to first quarter 2017's total of 278,295 sf. Two large downtown buildings, the Hynds building and the former Z's Furniture, remain vacant and together represent 29.1 percent of the total vacant square footage of office space.

By the end of the current quarter, the volume of available medical space increased substantially to 29,742 sf due to the addition of a former surgical center. The vacancy rate for this property type nearly doubled from 3.2 percent in the first quarter of 2017 to 6.3 percent in the second quarter. One year ago the vacancy rate for medical space stood at 10.8 percent.

NOTE: For a complete listing of available commercial properties in the Greater Cheyenne area and discussion of changes in the commercial building market over the second quarter of 2017, please see the Wyoming Center for Economic Analysis @ LCCC's homepage (www.wyomingeconomicdata.com) and click on Commercial Property Opportunities.

Note: FR=final revision. Statistics through 2015 are now final and will no longer be revised going forward.

Vacancy rates for 2016 are based upon recently revised 2015 baseline numbers.

Residential Housing Market

Table 7 provides data on the local residential housing market, both city and rural areas. Housing data from Core Logic were included in both the Economic Indicators and Annual Trends reports for the last four years.

Unfortunately the cost of these data is now prohibitive and the data are no longer included in our reports. We have obtained a few similar data series from RealtyTrac and these data series will be included going forward.

The Cheyenne Board of Realtors reported a 33.8 percent increase in the supply of homes for sale in the city of Cheyenne and a 16.5 percent increase in the supply of homes for sale in the rural part of Laramie County from the first to the second quarter of 2017.

Over the last year, the supply of homes for sale was up in the city of Cheyenne; it increased from a monthly average of 225 units for sale in the second quarter of 2016 to a monthly average of 272 units for sale in the second quarter of 2017. There was a 4.3 percent decrease in the supply of homes for sale in rural Laramie County over the last year, from a monthly average of 108 in the second quarter of 2016 to a monthly average of 103 in the second quarter of 2017.

The average sales price for homes in the city of Cheyenne rose over the last quarter, from \$228,674 in the first quarter to \$237,933 (4.0%) in the second quarter of 2017. The average sales price was also up over the last year, from \$229,872 in the second quarter of 2016 to \$237,933 in the second quarter of 2017 (3.5%).

The average sales price for homes in rural Laramie County rose from \$339,380 to \$353,059 (4.0%) from the first to the second quarter of 2017. Year-over-year the average sales price for homes in rural Laramie County rose slightly from \$351,577 in the second quarter of 2016 to \$353,059 in the second quarter of 2017 (0.4%).

Table 7 also contains foreclosure data. RealtyTrac reports the number of newly initiated foreclosures, regardless of lien status. The WCBEA@LCCC then measures the foreclosure rate as the percentage of homeowners with a mortgage who have a **newly initiated foreclosure**. In second quarter of 2017 there were 12 foreclosures initiated in Laramie County. This is a decrease of 65.7 percent from the first quarter of 2017 and a 64.7 percent decrease year-over-year. The average monthly foreclosure rate declined from 0.2 percent in the first quarter to 0.1 percent in the second quarter of 2017. The total number of negative equity loans increased from 651 in the first quarter to 751 in the second quarter of 2017 (15.4%) and rose by 49.0 percent over the last year. While these look like striking changes, the number of negative equity loans has historically fluctuated by large amounts.

Apartment Vacancies

The vacancy rate in sampled apartments rose from 5.0 in the first quarter to 5.2 percent in the second quarter of 2017. One year ago, in the second quarter of 2016, the vacancy rate was 2.7 percent. The vacancy rate two years ago was 7.5 percent; however, this rate was artificially high due to a significant number of newly constructed apartments that were quickly absorbed by the rental market. The last time the true vacancy rate was consistently in the 5.0 percent range was in 2009.

The significant increase in the number of unfurnished apartments – from 26 in the first quarter to 50 in the second quarter of 2017 – is the result of the entry of the Carter Cottages development into the rental market.

Table 7 below presents the above data.

Sources: WCBEA from RealtyTrac and Cheyenne Board of Realtors.

Notes: Unless otherwise noted, data represent quarterly averages.

¹ The number of mortgages where the lender has initiated foreclosure proceedings and it has been made known through public notice.

² The number of newly initiated foreclosures as a percentage of housing units with a mortgage. Data on housing units with a mortgage were obtained from the Wyoming Community Development Authority (WCDA) (<http://www.wyomingcda.com/documents/Laramie%20County.pdf>). According to the WCDA, there are 25,130 owner-occupied households and 31.3 percent of these households do not hold a mortgage.

³ The number of mortgages that are in negative equity, calculated as the difference between the current value of the property and the initial mortgage amount on the property.

⁴ Average days on market calculated as number of days from the listing date to the date the property is under contract.

⁵ Vacancy data are obtained from the Wyoming Tribune Eagle.

⁶ Vacancy rate is calculated from WCBEA large apartment complex sample.

Demographics and Tourism

The following tables provide data on current demographic and tourism trends within Laramie County. Table 8 presents information on human and social services and school enrollments in Laramie County and Table 9 presents tourism indicators.

The number of people sheltered at the Safehouse decreased from a monthly average of 58 in the first quarter to 54 in the second quarter of 2017 (-6.9%), but increased from a monthly average of 50 to 54 over the last year (8.1%). The Comea Shelter recorded an 8.4 percent increase in the number of unit stays (nights of lodging) provided from the first to the second quarter of 2017, and a 6.8 percent increase over the last year.

There has been a fairly consistent decline since 2013 in the number of Department of Family Services (DFS) – Temporary Assistance for Needy Families (TANF) distributions. However, these distributions increased over the last year, from 115 to 121 (5.2%) and also increased from the first to the second quarter of this year (5.2%).

With the exception of the number of visitors to Visit Cheyenne (16.4%), tourism numbers declined over the last year. Trolley ridership (-30.2%), the Old West Museum (-19.1%) and the number of visitors to the Pine Bluffs Information Center (-14.9%) and the I-25 State Visitors Center (-3.9%) all declined.
